

ABSTRACT OF THE DISCLOSURE

A method for correcting for exposure in a digital image which was captured by an image capture device and which is to be printed on a printer which forms monochrome or color images, on a medium, including providing a plurality
5 of exposure and tone scale correcting transforms, each such transform being unique to an exposure condition and which corrects exposure and tone scale for a digital image captured by the capture device for such unique exposure conditions and to be printed by the printer, applying the plurality of transforms to the digital
10 image and printing a plurality of images corresponding to the digital image on which the transforms were applied, and determining the most satisfying printed image to the user which corresponds a particular transform to be used to make visual images from the digital image.
